

AN ISO 9001 : 2015 COMPANY

*Reliable and better*

[www.tecbearing.com](http://www.tecbearing.com)

We are proud to introduce ourself as TEC Bearing.

A leading quality provider of automotive & industrial bearings. Company was established in 1990 by professionally qualified & experienced promoter to manufacture ball and roller bearings. Company has established its name in the replacement market as well as original equipment manufacturers. Our Annual production capacity 2 million bearings.

## Product Range

TEC Bearing offers wide range of bearings

- Taper Roller Bearings
- Double Row Tapered Roller Bearings
- Cylindrical Roller Bearings
- Deep groove Ball Bearings
- Spherical Roller Bearings

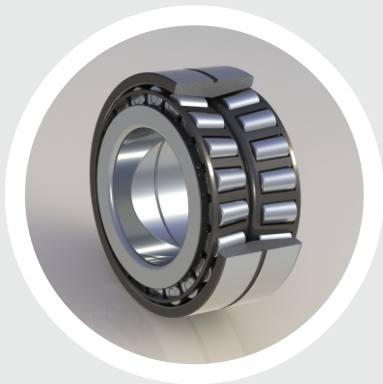

## Manufacturing Capacity

ID : 20 mm to OD : 300 mm

## Control

Company have also facility of checking the metallurgical structure of bearing components. We maintaining consistent quality of micro structure as per norms in prime raw material as well as in heat treated rings, rollers and balls. we also consider the noise and vibration of tapered cylindrical ball bearing and deep groove ball bearings we also check the visual inspection of components & final assembly. We make bearings from high quality bearing steel SAE 52100 or 100 Cr6 (high carbon chromium steel) internationally accepted grade to make bearings.

## Technical

We manufacture profile type bearings specially designed for automotive application considering road, operating condition and environment condition we continuously think how to increase the bearings performances. Currently we have roundness and roughness of MITUTOYO make in our standard room for quality control so that each and every report of manufacturing batch can be submitted to customers.

## Application

Automotive sector  
Agricultural sector  
Machine tool sector  
Power generating sector  
Mining sector

## Relation With Customer

Company always thinks about benefit of customer.  
company gives satisfaction to their customer by quality.  
value added service with competitive rate. we  
believes in long term relation with their customer.

**We have fully automated cnc grinding line with in process gauging system from MARPOSS, Italy.**

**Our advance infrastructure is spread across 25000 sq ft area.**

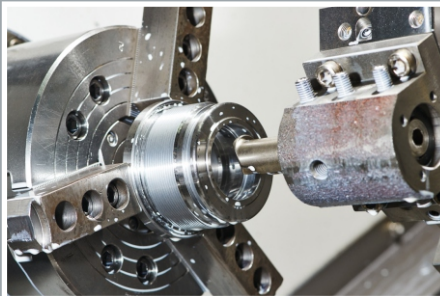

**“ TEC Bearing’s mission is to provide total customer satisfaction by supplying our product with on time delivery and technical supports.”**

AN ISO 9001 : 2015 COMPANY

## Our export market :

Mfg. By.:

**TEC BEARINGS**
